

Windows and Chair left at Infineon

Posted by Salanis42 - 21 Mar 2010 13:57

I picked up someone's side windows and black folding chair that got left behind at the Paddock at Infineon today. Not sure whose they are, but you can either come get them, or I'll bring them out to the next event.

The windows are Rick Lofgren's. I will let him know that you have them.

Not sure who's chair though.

Nice meeting you and hopefully see you at Thunderhill next month.

The chair is mine. I can get it at Thunderhill if you are going to be there.

By the way, what did you think of Infineon with the race car?

I am currently planning to be at Thunderhill next month, but I'll have to see how my money situation turns out.

Infineon was great. I'm really liking that car. It'll take a little more seat time to fully get the hang of the handling characteristics of the car. But all figured, it's great, solid, and predictable. I can't quite wring

out the full capabilities of it yet, but I'm comfortable enough to take it into traffic now.

Really looking forward to actually getting on track with the rest of you!
