944-SPEC - 944SPEC - low cost wheel to wheel racing Generated: 7 September, 2025, 08:39

90% complete 944spec car with 2 engines Posted by Tabbasco - 22 Mar 2013 06:30
I am sad to sell this project but just do not have the time to complete the task.
The car is lightened and caged >2350 lbs.
1st engine has 67k miles and was running perfectly before removal. The second engine has rebuilt head, bearings replaced and is a quick rebuild.
Oil cooler parts
Weltmeister Rear Bar
Koni Shocks
Extra set of brakes, lots of brake pads
Cut out switch
1 aluminum and 2 sets of steel Arms (one set is reinforced)
Extra flywheel and Pressure plate
2 hatches
I had originally planned to Lemons the car first and then 944 Spec.
This car can be finished for less than \$1500
The car was tracked recently and everything worked well.
\$2500 OBO
