

CV Axles for late offset

Posted by FastTater - 28 Feb 2013 12:05

I have a set of new CV axles that came off a late offset rear end. They have only been used for one DE weekend. I can include pictures as needed.

These are two axles with both new cv joints and boots.

\$200 plus shipping from 29063

If they are new GKN CVs, I would pay \$200 shipped to 91977

I am not sure. I took some pictures of them. They came with a 86 I bought and I only ran them one weekend. They appear to have been rebuilt with new joints and boots. I will take best offer + shipping.

Unless you can confirm that the CVs are new GKN, I will have to pass. I can get a rebuilt axle for \$50 from Autozone. I had one of those break in a race and do not want to take any more chances.
