

WTB Transaxle parts

Posted by joeblow - 05 Aug 2013 14:10

Guys I am putting together an early box and would like to retain the speed sensor set-up. So I need the parts to convert it to the late set-up. Are there any torn up late gearboxes out there I can talk you out of the speed drive and sensor from?

I probably can help, but am tied up for a few days.

I will PM with details.

Chuck

I have the one that came out of my 86. It has a broken ring gear. Tell me everything you need and I'll tear into it this weekend. Are you going to be at Miller?

I need parts 17,18,19 on the first pic and the Speedometer Pinion Drive Wheel part number 016409187 which is not pictured but is the gear that part number 17 is driven from off the R&P.

Thanks!
