Promotion on	Hawk	Brake	Pad	ls
--------------	------	-------	-----	----

Posted by Sterling Doc - 13 Dec 2011 20:06
Guys, Jay Andrew is again stepping up to offer us 944 Spec racers an off-season discount on Hawk Pads:
Here's the deal
-25% discount off of list price for 2 or more sets of Hawk Performance brake pads. Front or Rear any compound.
-Free Shipping on 4 or more sets.
-Offer for the first 25 customers.
-Online orders only through Andrew-Racing.com
-Special ends January 31, 2012
Coupon Codes:
944spec25 for the 25% discount on 2 or more sets.
944freeshipping for the free shipping on 4 or more sets.
No need to go through me any more, you guys can order directly through Andrew-Racing.com
For example:
Front Blue HB199E list \$157.70-25%=\$118.8
Front DTC-70 HB198U list \$205.92-25%=\$154.44
Rear Blue HB198E list \$152.20-25%=\$114.15
Rear DTC-60 HB198G list \$175.76-25%=\$131.82

Awesome - Thanks Eric and Jay
Re: Promotion on Hawk Brake Pads Posted by cgktexas - 14 Dec 2011 07:01
Thanks.
This seems pretty much inline with Porterfield (20% off for NASA members)
Do the DT-60 rears work better with the Blue front. I know I have seen some run blue front and rear, but have also heard of other using a different compound in the rear (to reduce rear lock up?)
Getting ready to purchase, so just looking for some input here.
Thanks again
-Curt
Re: Promotion on Hawk Brake Pads Posted by Sterling Doc - 14 Dec 2011 15:46
I would not expect DTC-60's to improve rear lockup versus Hawk Blues, as they are at least as aggressive. Many local guys have had luck with the HP+ compound in the rear to reduce rear lockup.
DTC-60s may work in the rear, with DTC-70s in the front, but not in combination with the Blues.

From my recent experience, after switching from Hawk Blues in the front to DTC-70s front and 60s rea I stopped flatspotting front tires from the blues locking up and noticed a remarkable difference in my braking application feel.

Thanks! I may end up going that route. How are they on rotors?
