| The guys at clownshoe put one in my car near the end of last year and I really like it. I had a nine meister (re branded guards unit) in my car before which needed to be rebuilt. for the price of the re build I out a new wavetrac in. It does help under braking and with a wheel off a curb. I don't notice a difference between the guards and the wavetrac and I don't have to worry about keep it maintained. |
| Just my 2 cents.  |
