Wheel Spin Help Posted by RacerX - 27 Nov 2013 18:56	
Going around some corners I noticed that I get wheel spin. I don't have an LSD. one, what can I do to help minimize the wheel spin?	Aside from installing
Re: Wheel Spin Help Posted by norman#99 - 28 Nov 2013 00:32	
Go as soft as possible with your sway bars.	_

Rear sway and shocks are set at their softest setting already.

Stiffening the front is next.

Re: Wheel Spin Help Posted by Big Dog - 29 Nov 2013 10:20	
There is nothing more to be done without LSD. If you stiffen the front, you simply more forcing a lift of the throttle. In the end, it will slow down your lap time.	make the car push
Your only approach is to use throttle control to get as much as you can get withou tire too much. Actually a little spin can help rotate the car but not that much. You can do so be aware of the spin and minimize it.	•
