

944 Spec Cars Needed in the Southeast!

Posted by AgRacer - 17 Aug 2015 10:23

The Southeast Region is growing! We need cars!

I have one racer who is immediately seeking the purchase of a current race car but we have other prospective racers as well that could be purchasing soon.

The racer who wants to buy now is looking for a car which specifically has a weld in cage and most of the other "right" parts already installed and well maintained.

If you know of any cars around the country that are either just sitting, or currently racing with a for sale sign attached, please let me know and I will advertise around to our SE Region prospective racers!
