Nice...I see a few places I could improve. Since I am no threat....what suspension settings do you use for RA1 and R888?

Sorry I was out of town for a few days.

R888 2.5 - 3 degrees camber in front 1/16 toe out each side

1.5 - 2 degrees rear 1/16" toe in each side

RA-1 3 - 3.5 degrees camber front same toe

2 - 2.5 degrees rear same toe.

I use Bilstein shocks so no adjustments.

Camber adjustment is based on tire temps per track/day.

Get a base line set up and work on lines and proper timing of throttle application. If you have help and proper tools then start taking tire temps.

If you have questions about that please let me know.
