944-SPEC - 944SPEC - low cost wheel to wheel racing Generated: 6 September, 2025, 04:58 Master cylinder Posted by rd7839 - 07 May 2013 07:21 Hey guys, I've heard repeatedly that you can't mix and match Girling and Ate parts like master cylinder and booster but Clark's garage says otherwise. The Girling m.c. Is a lot cheaper but will it work? If not why? Re: Master cylinder Posted by 944Racer72 - 07 May 2013 19:42 If you need it, I have a Girling booster too. Re: Master cylinder Posted by topley - 10 May 2013 13:01 according to this thread in the troubleshooting section the swap works... www.944spec.org/944SPEC/forum/troublesho...d-booster-comparison Re: Master cylinder Posted by rd7839 - 10 May 2013 16:10 Thanks, I missed that topic. So it seems the big difference is steel vs aluminum. At 1/4 the price, I'll take the steel one! Re: Master cylinder Posted by Big Dog - 10 May 2013 16:26

Al. is several grams lighter and the master cylinder is higher up, Ron. The extra money will cut your lap

times by at least 2.5 seconds per lap!
