I will be replacing the driver side front fender which was remodeled during the miller week end. It looks like screws a long the top and three on the firewall area. Has anyone done this and if so how long should I expect it to take.

thanks

Thank joe- I already have a nice replacement so i will be swapping them tonight. No crunched up race cars. Hammering and bondo= painting which I don't like.

With my car the paint part is a given anyway. No spare fender will match. It is actually more work for me to sand, prime and paint (two colors) a replacement fender than to just fix and use a little bondo to clean up the hammer marks.
