AC delete bracket source? Posted by Chris - 14 Apr 2008 00:22
I know some of you that bought the AC delete bracket actually called the company that produces them and had them match their ebay price and ship directly. Any way I could get that contact info and the price?
Much appreciated,
Chris

Ka-pow !! www.broadfootracing.com/ found it on page 5 of this thread www.nasarockymountain.com/n asa forums/sht=alternator+bracket
My junkyard bracket (thanks to Ken) is really sturdy and working out well. Did you break another turnbuckle?
Re:AC delete bracket source? Posted by Chris - 14 Apr 2008 01:09
Thanks, Cullen
i did, which makes 3 turnbuckles ive broke. I saw dave w's and liked how it moves the alternator out of the way of the hoses and intake, plus lower center or gravity is a +

I fabricated a bracket for Michelle's car out of some scrap 3/16 x 1" steel bar stock. Made it exactly like the one in our Tech section, even though I didn't have a Martha Stuart ruler.

Works fine, lasts a long time!!
Re:AC delete bracket source? Posted by joepaluch - 14 Apr 2008 06:18
use the Porsche factory A/C delete bracket. Works great and I have never had an issue with the turnbuckle in all my years of racing the car.
Re:AC delete bracket source? Posted by SvoChuck - 14 Apr 2008 07:54
Yea chris is hard on those he broke mine too. so that makes like 4 or 5 you've broken
